Description of problem:
Create host using compute_profile the 'image' field under 'OS' tab remain disabled and host create failed as well

How reproducible:
Always

Steps to Reproduce:
1. Create CR using AzureRM.
2. Associate compute profile with created CR.
3. Now try to create a host(UI: hosts => Create Host) using this CR and CP.

Actual results:
Under 'Operating system' tab unable to select 'Image' and it by default select any one and this field('Image') shows as disabled.
   hence after submit the create_host same failed with error 'undefined method start_with?'

Expected results:
Should be able to select values under 'Image'

Additional info:
Same has been observed for CR GCE and EC2 as well.

Revision 6bad7d99 - 01/23/2020 02:14 PM - Kavita Gaikwad
Fixes #28725 - prevent image field from disabling on host form

While creating a host using compute_profile, the image field under OS tab remain disabled & user won't be able to select image for provisioning.
With this commit, it prevents this behavior on host form.
