**Pull request:** https://github.com/theforeman/foreman/pull/7379

**Fixed in Releases:** 2.0.0

**Description**

It happens because the redux state gets copied into plugins which create multiple instances of the redux store. A solution might be to turn the store into a global singleton.

Revision 200ffeab - 01/23/2020 11:04 AM - Avi Sharvit

Fixes #28844 - protect the state from duplication

Make the redux state resilient to code duplication by saving the state globally on the window object.
