Katello - Bug #29460

RH repos not shown in Content -> Red Hat Repositories -> Recommended Repositories

04/02/2020 02:30 PM - Jan Hutař

Status: Rejected
Priority: Normal
Assignee:
Category:
Target version:
Difficulty:
Fixed in Releases:
Triaged: No
Found in Releases: Katello 3.16.0
Red Hat JIRA:

Bugzilla link:
Description

katello-3.16.0-0.2.master.el7.noarch

Steps to reproduce:
1. Upload subscription manifest so in Content -> Subscriptions I can see these subs:
   Employee SKU    Physical    ES0113909    10913844    2016-03-24 05:00:00 +0100    2022-01-01 05:59:59 +0100 0 50000
   Red Hat Satellite Infrastructure Subscription    Physical    MCT3718    11972528    2019-08-15 06:00:00 +0200 +0200 2020-08-15
   05:59:59 +0200 0 100
2. Go to Content -> Red Hat Repositories and enable Recommended Repositories
3. Unfold "Red Hat Enterprise Linux 6 Server (RPMs)" or "Red Hat Enterprise Linux 7 Server (RPMs)" or "Red Hat Enterprise Linux 8 for x86_64 - BaseOS (RPMs)"

   It shows "No repositories available." for all of them. This is what foreman-tail shows when I unfold it:

   [...]

History

#1 - 04/03/2020 09:30 PM - Jan Hutař
- Status changed from New to Rejected

OK, it worked for me now (different installation, most probably different manifest as well). I'm sorry for the mess!
