Description

As part of this effort, hooks that have a similar naming scheme or functionality should be reduced to a single parameter.

The current state is having two sets of hooks directories: hooks/ and katello/hooks/. There are some hooks that have similar functionality and some that are only relevant if Katellos is enabled. The proposal here is to merge the hooks directories and combine some hooks into one. See [Hooks Cleanup RFC](https://community.theforeman.org/t/rfc-cleaning-up-installer-hooks/17089) for more details.

Subtasks:

- Feature #29797: Merge --reset-foreman-db and --reset into --reset-data [Closed]
- Refactor #29798: Move --lock-package-versions to hooks/ [Closed]
- Refactor #29799: Add --clear-pulp-content to hooks/ and scope on katello module being ... [Closed]
- Feature #29800: Remove --clear-puppet-environments due to Pulp 3 [Closed]
- Refactor #29801: Move --tuning option to hooks/ [Closed]
- Feature #29802: Replace --skip-check-i-know-better with --disable-system-checks from k... [Ready For Testing]
- Refactor #29803: Add all certs related hooks to hooks/ and scope them on Katello modul... [Closed]
- Feature #29804: Drop upgrade-mongo-storage-engine from hooks [Duplicate]
- Feature #29805: Drop --disable-resolve-mismatches [Rejected]
- Feature #29822: Consolidate checks/ and hooks that act as checks as a mechanism that w... [New]
- Feature #30006: Remove MongoDB Storage Engine Migration Hook [Closed]
