### Description

Related to [https://projects.theforeman.org/issues/29092](https://projects.theforeman.org/issues/29092)

My user (an ldap user with admin role) is configured with Location and Organization 'Default on login' set to 'Default Location' and 'Default Organization' respectively. When I go to the new /auth_sources UI, my ldap source is listed, but when I click on it, I get the 404 and `AuthSourceLdap not found Please try to update your request`.

If I switch to ‘Any Location’ and ‘Any Organisation’ everything seems to work fine.
