Foreman - Bug #30382

location/organization name is translated when using different locale and an existing string as name

07/13/2020 01:32 PM - Dominik Matoulek

Description
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1662478

Description of problem:
When I create location with "openstack" string in the name, it gets expanded into "RHEL OpenStack Platform" in the location switcher.

How reproducible:
always

Steps to Reproduce:
1. Administer -> Locations -> New Location
   Name: "Location for capsule capsule.openstack.example.com"
   -> Submit -> Submit
2. Check location switcher in upper part of the page

Actual results:
There is "Location for capsule capsule.RHEL OpenStack Platform.example.com"

Expected results:
There is "Location for capsule capsule.openstack.example.com"

Additional info:
Are there any more strings that get expanded like this? I have tried "rhel", "ansible", "rhev" and "rhv" but have not hit similar issue. This is regression compared to 6.4.
