Description
Since katello-agent is deprecated, should we be installing it by default?
Allowing for parameters to control when katello-agent, katello-host-tools, and katello-host-tracer-tools are installed would also be helpful as katello-agent is hard coded to be installed when kt_activation_keys parameter is passed as is the case when specifying an activation key in the host's host group.

Associated revisions
Revision 7599fbd2 - 10/29/2020 11:18 AM - Jeffrey Cutter
Fixes #30647 - Parameterize redhat_register install parameters for kt_activation_keys
Parameterize redhat_install_host_tools and redhat_install_host_tracer_tools.
