**Pull request:** [https://github.com/theforeman/foreman/pull/7987](https://github.com/theforeman/foreman/pull/7987)

**Fixed in Releases:** 2.3.0

**Found in Releases:**

### Description

Uploaded reports render themselves on upload via RABL and it looks like this is very slow. Generally, it's not needed to read the inserted data, so we should be able to completely remove this and return nothing. Alternatively, we could optimize this.

Fixes #30838 - do not return report after create

Uploaded reports render themselves on upload via RABL and it looks like this is very slow. Generally, it's not needed to read the inserted data, so we should be able to completely remove this and return nothing. Alternatively, we could optimize this.

Let's discuss how to solve this. Since report API is under heavy load, I lean towards returning nothing, therefore deprecating the output completely. The question is how to do this, deprecation warning message is quite useless, so probably only Release Notes for 2.3?

### History

**#1 - 09/14/2020 01:15 PM - The Foreman Bot**

- Assignee set to Lukas Zapletal
- Status changed from New to Ready For Testing
- Pull request [https://github.com/theforeman/foreman/pull/7987](https://github.com/theforeman/foreman/pull/7987) added

**#2 - 09/14/2020 01:42 PM - Lukas Zapletal**

- Related to Refactor #30820: Drop SHA1 digest and use hash index instead for reports added

**#3 - 09/16/2020 07:14 AM - Lukas Zapletal**

- Subject changed from Optimize RABL rendering of uploaded reports to Do not return report contents (logs) after create

Renaming this issue to reflect the PR, creating a new one for refactoring.
