**Fixed in Releases:** 2.3.0

**Found in Releases:** 2.1.2, 2.1.3, 2.2.0

**Description**

Ohai,

currently, when creating a subnet via the API, one can set IPAM to “external” and also assign a smart proxy, but one cannot select the external ipam group.

the same is possible in the UI: [https://github.com/theforeman/foreman/blob/develop/app/views/subnets/_fields.html.erb#L26-L28](https://github.com/theforeman/foreman/blob/develop/app/views/subnets/_fields.html.erb#L26-L28)
