**Description**
The errors:fetch_log task depends on the multiline_request_pattern layout. If another layout is used, the output is incomplete and users should be warned about that.

Fixes #31262 - Warn about incorrect logging layout

a7874f5722625e3a64c557a4d2d445c8b67d1548 introduced a rake task to get error reports, but this requires the multiline_request_pattern logging layout. This warns users in case the layout is incorrect.
