**Description**

Cloned from [https://bugzilla.redhat.com/show_bug.cgi?id=1901504](https://bugzilla.redhat.com/show_bug.cgi?id=1901504)

1. Proposed title of this feature request
   Add 'snippet_if_exists' to default kickstart template

2. What is the nature and description of the request?
   Improve the usability of the default kickstart template
   For flexibility it would be useful to add 'snippet_if_exists' to the post nochroot section of the default kickstart profile.

3. How would the user like to achieve this? (List the functional requirements here)
   The section would look like this:
   ```erb
   post --nochroot
   exec < /dev/tty3 > /dev/tty3
   #changing to VT 3 so that we can see what's going on....
   <%= snippet_if_exists(template_name + " custom postnochroot") %>
   /usr/bin/chvt 3
   `(cp -va /etc/resolv.conf /mnt/sysimage/etc/resolv.conf
   /usr/bin/chvt 1
   ) 2>&1 | tee /mnt/sysimage/root/install.postnochroot.log
   <%= section_end -
   ```

4. List any affected packages or components.
   Template: kickstart_default.erb
