Foreman - Bug #31625
Puppet Environments are not listed properly in the SCP details page
01/14/2021 08:55 AM - Tomer Brisker

Status: Closed
Priority: Normal
Assignee: Tomer Brisker
Category: Puppet integration
Target version:
Difficulty:
Pull request: https://github.com/theforeman/foreman/pull/8247
Triaged: No
Fixed in Releases: 2.4.0
Bugzilla link: 1915943
Found in Releases:

Description
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1915943

Description of problem:
The Puppet Environments are not listed properly in Smart Class Parameters details page, based on the selected Organization taxonomy.

Version-Release number of selected component (if applicable):
6.8.2, 6.9.0

How reproducible:
always

Steps to Reproduce:
1. Have a Satellite with two or more organizations and two or more puppet environments containing a class with parameters
2. Go to Configure > Classes > select some class with params > tab "Smart Class Parameter"
3. See the Puppet Environments field and try to change the Organization scope

Actual results:
environments are not listed properly, for example:
"", common, and production"
"KT_abc_Library_def_1, common, and"
"", , and KT_abc_Library_def_1"

Expected results:
better phrasing

Additional info:
see the attached screenshots

Revision 55f57d37 - 01/15/2021 11:48 AM - Tomer Brisker
Fixes #31625 - Correctly display environments for class params

In case there is a taxonomy scope active and a certain param is present in an environment that isn't in the current scope, the field showing environments will display empty strings for this environment.
