### Description

In [01186b11dbc38ea45a570be758b681e1f5da7729](https://github.com/theforeman/foreman-installer/pull/642) this was added, but it doesn't really make sense in the Foreman scenario. Only Katello can use it, but you need more things on the proxy which is only provided by the foreman-proxy-content scenario.
