Description

Revision f3231f62 - 04/22/2021 08:27 AM - Amit Upadhye
Fixes #31790 - always delegate bootserver IP resolution to smart proxy

In 60c03b6a2e92c432ee66f2b27da634954c1b646c (reverse) DNS search for TFTP server (bootServer) was delegated to the Smart Proxy if was supported, as signaled via the dhcp_filename_hostname capability. At the same time, in Foreman 2.0, the fallback support was deprecated. This drops the compatibility code.

History
#1 - 02/02/2021 02:37 PM - Amit Upadhye
- Subject changed from Clean up deprecation for 2.5-develop to Update deprecation for 2.5-develop
