Description
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1934427

Description of problem:
Error message displayed when cloning a role without supplying name:
Oops, we're sorry but something went wrong undefined method 'id' for nil:NilClass

How reproducible:
always

Steps to Reproduce:
1. In Foreman UI: Administer > Roles
2. Pick a role, select Clone from the dropdown
3. Don't input any information in the form and click Submit

Actual results:
Red box with the aforementioned error

Expected results:
Information about the required field

Revision d5301b08 - 03/08/2021 02:37 PM - Ondřej Ezr
Fixes #32026 - cloned role throws error 500 if invalid
In e61362d1a103b4fbd79c838a8bb6f01986ab02a9 we've accidently forgot about the create action, but now save of invalid role would have end up with 500 error.
This moves to using 'cloned_from_id' instead of '@original_role' as source of the original role id as this information is easier to pass to the form.
- Triaged changed from No to Yes
- Target version set to 2.4.1
- Category set to Users, Roles and Permissions
- Subject changed from Saving invalid cloned role ends up with 500.
to Saving invalid cloned role ends up with Internal server error
