Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1967974

Description of problem:

Katello-change-hostname will error out if @scenario_answers['puppet'] is false (https://github.com/theforeman/foreman-packaging/blob/rpm/1.24/packages/katello/katello/hostname-change.rb#L170). We should skip `delete_puppet_certs` if this is the case.

Version-Release number of selected component (if applicable):

Katello 3.14

How reproducible:

Always

Steps to Reproduce:

1. Remove the puppet configuration from katello-answers.yaml
2. Run katello-change-hostname
3. 

Actual results:

deleting old certs
from /sbin/katello-change-hostname:23:in `<main>'

Expected results:

hostname changed successfully

Additional info:

Revision ee14227e - 06/07/2021 08:35 AM - Ewoud Kohl van Wijngaarden

Fixes #32725 - Make delete_puppet_certs handle all input

If a user runs the installer with --no-enable-puppet the value of @scenario_answers['puppet'] becomes false. false['ssldir'] raises an exception. By returning early, it's handled safely.
Subject changed from katello-change-hostname should handle --no-enable-puppet properly
to katello-change-hostname should handle --no-enable-puppet properly
- Pull request https://github.com/theforeman/foreman-packaging/pull/6749 added
