Packaging - Bug #32725

katello-change-hostname should handle --no-enable-puppet properly

06/04/2021 03:36 PM - Ian Ballou

Status: Closed
Priority: Normal
Assignee: Ewoud Kohl van Wijngaarden
Category: RPMs
Target version: 2.5.1

Triaged: No
Bugzilla link: 1967974

Description
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1967974

Description of problem:
katello-change-hostname will error out if @scenario_answers['puppet'] is false (https://github.com/theforeman/foreman-packaging/blob/rpm/1.24/packages/katello/katello/hostname-change.rb#L170). We should skip `delete_puppet_certs` if this is the case.

Version-Release number of selected component (if applicable):
Katello 3.14

How reproducible:
Always

Steps to Reproduce:
1. Remove the puppet configuration from katello-answers.yaml
2. Run katello-change-hostname
3.

Actual results:
deleting old certs
/usr/share/katello/hostname-change.rb:217:in `delete_puppet_certs': undefined method `[''] for nil:NilClass (NoMethodError)
from /usr/share/katello/hostname-change.rb:488:in `run'
from /sbin/katello-change-hostname:23:in `<main>'

Expected results:
hostname changed successfully

Fixes #32725 - Make delete_puppet_certs handle all input

If a user runs the installer with --no-enable-puppet the value of @scenario_answers['puppet'] becomes false. false['ssldir'] raises an exception. By returning early, it's handled safely.
