Foreman - Feature #32822

Resource template input for job templates

06/17/2021 09:13 AM - Leos Stejskal

Status: Closed
Priority: Normal
Assignee: Leos Stejskal
Category: Templates
Target version: 
Difficulty: 
Pull request: https://github.com/theforeman/foreman/pull/8600
Triaged: No
Fixed in Releases: 3.1.0
Bugzilla link: 
Found in Releases: 

Description

From https://issues.redhat.com/browse/SAT-3236:

It would be a user input similar to the Value Type search, requiring a Resource Type. When such input is rendered in the invocation form, it creates a select2 (or similar) drop down field allowing to search in all resources of a given type, e.g. ActivationKey. The macro loading such input, e.g. input('registration_activation_key') would then return the selected ActiveRecord instance of a selected ActivationKey, so the value would be stored as its id.
