Revision 8915e45f - 09/24/2021 09:37 AM - Marek Hulán
Fixes #33025 - allow filtering hosts by user id

Users would like to set filters so users can only see reports of hosts they own.

For that we can define an association on a Report based on the Host ownership. Then we can add a scoped search definition that could be used in Filter definition. The resulting scoped search term that can be used on any Report subclass is

```
host_owner_id = current_user
```

Instead of ‘current_user’, a specific user ID can be used too.

This will not take user group ownership into the consideration due to the complexity, especially when tree structure of user groups is considered.

Revision f0c0fa5b - 09/24/2021 09:37 AM - Marek Hulán
Refs #33025 - fix spacing of search definitions

History
