Installer - Bug #33106
Move more variables from in puppet-foreman to globals.pp
07/22/2021 08:14 AM - Evgeni Golov

Status: Closed
Priority: Normal
Assignee: Ewoud Kohl van Wijngaarden
Category: Foreman modules

Description
from https://github.com/theforeman/puppet-foreman/pull/974#pullrequestreview-711530448

As for other variables:

- version & plugin_version - I can still see a use case so I'm not entirely sure.
- user & group - these are hardly ever changed so I'd be in favor of moving them
- rails_env & app_root same
- vhost_priority same (perhaps even move it to apache.pp and only allow changing it via Hiera)

Associated revisions
Revision 0e45f205 - 07/22/2021 06:41 PM - Ewoud Kohl van Wijngaarden
Fixes #33106 - Move user, app_root, rails_env & vhost_prio to globals

These parameters are not commonly changed. Moving them to globals makes
the list of parameters in init.pp shorter and easier to manage. This
is of particular benefit in the installer while it shouldn't hinder
users of the module in a pure Puppet environment too much.
