Pull request: 

Description
Something like:

```
hammer subnet create --proxy-id <proxy>
```

or

```
hammer subnet import --proxy-id <proxy>
```

Import known data from proxy and associate DNS, TFTP and DHCP with the proxy

History

#1 - 04/30/2018 11:02 AM - Tomáš Strachota
- Category changed from Foreman commands (obsolete) to Networking
