Foreman - Bug #3569
Port in use by the browser is used in rendering the templates
11/04/2013 01:35 PM - Greg Sutcliffe

Description
We fixed the hostname version of this issue a while back, but the port got missed. If you use a non-standard port to access foreman, it'll be written into your templates, which makes tunnelling in from home a real pain.

We should update :foreman_url to be a real url and then parse it for the host and port
