Foreman - Feature #3856

Expandable text areas for overridden parameters

12/11/2013 03:46 PM - Ian Tewksbury

Status: Closed
Priority: Normal
Assignee: Tomer Brisker
Category: Web Interface
Target version: 1.9.0
Difficulty: Pull request: https://github.com/theforeman/foreman/pull/2306
Triaged: Fixed in Releases:
Bugzilla link: Found in Releases:

Description
If a parameter is overwritten you get a scrollable text box but if the parameter value is multiple lines this is not very readable.

It would be ideal to auto expand the text box to multiple lines so as to make the entire value readable at once as well as providing functionality for the user to adjust the size of the text area manually if needed.

I do not know how to close this, but it was just brought to my attention this is a problem with the fact that I am stuck in IE at the moment and not an actually functional browser.

- Status changed from New to Rejected

No problem, closing. Yeah, Firefox, Chrome etc will allow you to expand text areas with drag + drop.

- Status changed from Rejected to New

Reopening as although the text area can be resized in most browsers, we should make the default size usable when there's a lot of content present.

Following a discussion with Dominic on IRC, see this attachment for an example of where this would be useful (there's ~100 lines in that box).
