**Description**

This is about 50% of what's asked for on #2991 - it would allow user-data in cloud-init to set up a vm instead of using SSH to connect to the machine. Per-user user-data can be implemented later

**Related issues:**

- Related to Foreman - Feature #2991: Allow for user-data to be injected into cloud-init templates and finish scripts added
- Related to Foreman - Bug #4111: Add image user data flag to API added

**Associated revisions**

**Revision fba2bf5f - 01/15/2014 10:26 AM - Greg Sutcliffe**

Fixes #3927 - Allow VMs to provision via user-data
