Katello - Bug #5081

Product deletion does not handle repositories correctly

04/04/2014 07:28 PM - Justin Sherrill

**Description**

Currently repo deletion is dynflowed, but product deletion is not. As a result deleting a product causes the repos in katello to be deleted but not in pulp or the content removed in elastic search.

**Related issues:**

- Related to Katello - Refactor #6185: Dynflowize product delete
  - Closed 06/12/2014
- Blocks Katello - Feature #6180: Implement org destroy
  - Closed 06/12/2014

**Associated revisions**

Revision 184ff842 - 06/20/2014 12:14 AM - Partha Aji

Fixes #5081, #6185 - Dynflowing product delete

Deleting product was previously doing a repository.destroy_all. This commit aims to address that and other product deletion issues by dynflowing the entire product delete orchestration.

Also includes changes by ivan for
Fixes #5081 - use Dynflow polling feature for candlepin async actions

Revision 71f4a53d - 06/20/2014 04:14 AM - Partha Aji

Fixes #5081, #6185 - Dynflowing product delete

Deleting product was previously doing a repository.destroy_all. This commit aims to address that and other product deletion issues by dynflowing the entire product delete orchestration.

Revision 50f47cc9 - 06/20/2014 09:40 AM - David Davis

Merge pull request #4218 from parthaa/product-destroy

Fixes #5081,6185 - Dynflowing product delete
Fixes #5081,6185 - Dynflowing product delete

History

#1 - 04/11/2014 08:59 PM - Bryan Kearney
from se training:

Lab11: if a product is deleted without first deleting the repository, the repository name cannot be reused. I suspect that the repository name is not getting deleted from the database.

#2 - 04/11/2014 08:59 PM - Bryan Kearney
- Bugzilla link set to https://bugzilla.redhat.com/show_bug.cgi?id=1086933

#3 - 04/24/2014 07:48 PM - Justin Sherrill
- Legacy Backlogs Release (now unused) set to 13
