Description

Associated revisions

Revision 5e89a081 - 06/17/2014 04:03 PM - dustin tsang
Fixes #6154, #6253 - ak/ch name resolver for lfenv
Fixes a few issues with activation-key and content-host

1) This provides resource_alias from --environment, --environment-id to --lifecycle-environment, --lifecycle-environment-id

2) fixes issue with resolving the environment by name: --environment or --lifecycle-environment flag did not work resolving by name was using environment resource instead of the lifecycle-environment resource.
