hammer activation-key update fails for all scenarios

06/17/2014 07:10 PM - dustin tsang

Status: Closed
Priority: Normal
Assignee: dustin tsang
Category: Hammer
Target version: Katello 2.0

Description
Steps to Reproduce:
1. Create Activation key
   1. `hammer activation-key create --organization-id=1 --name='ak' --content-view='cv1'
      Activation key created

2. Check Activation key info
   1. `hammer activation-key info --name='ak' --organization-id=1
      Name: ak
      ID: 6
      Description:
      Lifecycle Environment: cv1
      Content View: cv1
      Host Collections:

3. Try updating Activation key:

   Scenario 1:
   1. `hammer activation-key update --name='ak' --organization-id=1 --new-name='ak123'
      Could not update the activation key:
      Error: Missing options to search environment

   Scenario 2:
   1. `hammer activation-key update --name='ak' --organization-id=1 --new-name='ak123' --environment=''
      Could not update the activation key:
      Error: environment found more than once

Actual results:
Activation key update errored

Expected results:
Activation key update works successfully

Additional info:
All hammer activation-key update scenarios are blocked with this same issue. Example:

1. `hammer activation-key update --name='ak' --organization-id=1 --environment='DEV' --content-view='cv1'
   Could not update the activation key:
   Error: environment found more than once

Associated revisions
Revision 064ab68c - 06/17/2014 08:20 PM - dustin tsang
Fixes #6258 - env_id & cv_id optional in ak update

Activation Key update should allow passing of environment_id and content-view to be optional since creation allows the existence of Activation Keys without a lifecycle-environment or content-view associated.

Revision c5bbf048 - 06/17/2014 08:47 PM - Thomas McKay
Merge pull request #4290 from dustint-rh/ak_put_env_not_required

Fixes #6258 - make env_id optional in ak update

History

#1 - 06/17/2014 07:14 PM - dustin tsang

issue is that update action's apipie documentation requires 'environment_id'. environment_id should not be required since create allow the creation of content_view without an environment.

Changing the apipie documentation so that environment_id is option should solve Scenario 1. Scenario 2 not be able to be solved since, that cause would be searching for a environment where name == "
