Hammer CLI - Feature #6754
JSON and/or YAML structured output adapters

07/23/2014 01:09 PM - Dominic Cleal

Status: Closed
Priority: Normal
Assignee:
Category: Hammer core
Target version: 1.7.2
Difficulty: Team Backlog:
Triaged: Fixed in Releases:
Bugzilla link: 1122650
Pull request: https://github.com/theforeman/hammer-cli/pull/145
In Kanboard:

Description
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1122650
Description of problem:
Hammer has CSV as a structured format output, but it's not a particularly well-defined format. It would be preferable to have JSON and/or YAML structured outputs - probably simply returning the JSON from Foreman's API.

How reproducible:
Always

Steps to Reproduce:
1. hammer --output json domain list

Actual results:
separate lines, base formatter

Expected results:

```json
{
    total: 1
    subtotal: 1
    page: 1
    per_page: 20
    search: null
    sort: {
        by: null
        order: null
    }
    results: [
        {
            id: 1
            name: "example.com"
            fullname: null
            dns_id: null
            created_at: "2014-07-07T14:50:06Z"
            updated_at: "2014-07-07T14:50:06Z"
        }
    ]
}
```
