**Description**

In the settings page, there are several tabs regarding global options or plugins options.
- The columns' name like "General", "Auth", ... are not translated
- In the Provisioning tabs, these 2 strings are not translated: "Certificate that Foreman will use to encrypt websockets" "Private key that Foreman will use to encrypt websockets"

fixes #7152 - translate setting category names

**History**

#1 - 08/19/2014 11:19 AM - Dominic Cleal
Looks like the category names are translated, but not extracted anywhere.

The websockets settings appear to be in Transifex for me, maybe the translated versions haven't been pulled back from Transifex yet ([https://www.transifex.com/projects/p/foreman/viewstrings/#fr/foreman/29158086?q=websocket](https://www.transifex.com/projects/p/foreman/viewstrings/#fr/foreman/29158086?q=websocket)).

#2 - 08/20/2014 07:31 AM - Dominic Cleal
- Subject changed from String not translated in foreman settings (Administer/Settings) and is not available from transifex to Category strings not translated in foreman settings (Administer/Settings)

Hello Everyone,
Is any update on this issue ? It impossible preserve setting and replace certificate to commercial one for novnc certificate. And I can't find where settings for it settings.yaml it get ignored.

Slava.
Slava, this issue is about translation, nothing to do with SSL certificates.
