Revision 1f82adb0 - 12/24/2019 03:00 PM - Tomer Brisker
Fixes #7570 - Replace 'secret_token' with 'secret_key_base'

This new config setting was introduced in Rails 4 to allow encrypting cookies. The old setting is being removed in Rails 6.

History

#1 - 09/22/2014 09:16 AM - Joseph Magen
http://edgeguides.rubyonrails.org/upgrading_ruby_on_rails.html

Rails 4.0 encrypts the contents of cookie-based sessions if secret_key_base has been set. Rails 3.x signed, but did not encrypt, the contents of cookie-based session. Signed cookies are "secure" in that they are verified to have been generated by your app and are tamper-proof. However, the contents can be viewed by end users, and encrypting the contents eliminates this caveat/concern without a significant performance penalty.
